

As enclosed to IPER

**We claim:-**

5

1. Dye preparations comprising, each percentage being based on the weight of the preparation,

10

a) from 0.1% to 30% by weight of one or more anthraquinone, quinophthalone or azo dyes which are free of ionic groups as a component (A),

b) from 0.1% to 20% by weight of a dispersant consisting of a naphthalenesulfonic acid-formaldehyde condensation product having an average molecular weight of at least 11 000 g/mol, as a component (B),

15

c) from 0.1% to 90% by weight of one or more mono- or polyhydric alcohols as a component (C),

d) from 0% to 5% by weight of customary assistants as a component (D), and

e) if appropriate water ad 100% by weight.

20

2. The use of dye preparations as claimed in claim 1 as ink for ink jet printing.

3. The use of dye preparations as claimed in claim 1 for sublimation transfer printing.

4. The use of dye preparations as claimed in claim 1 for printing textile substrates.

25

5. The process for printing textile substrates by the ink jet printing process using dye preparations as claimed in claim 1.

6. The printed textile substrates obtainable by the process of claim 5.

30

7. The process for printing textile substrates by the sublimation transfer printing process using dye preparations as claimed in claim 1.

8. The printed textile substrates obtainable by the process of claim 7.
